PERMISSIONS

PROTECTION

LIFECYCLE

Lifecycle rules let you apply actions to a bucket's objects when certain conditions are met – for example, switching objects to colder storage classes when they reach or pass a certain age. Learn more

If an object meets the conditions for multiple rules:

- Deletion takes precedence over a change in storage class.
- Changing objects to colder storage classes takes precedence over changing to warmer ones (ex. objects will switch to the Archive storage class instead of Coldline if there are rules for both).
